# Personal, Social, Health, Citizenship & Economic Education (PSHCE)

Including Relationships & Sex Education (RSE)

#### Intent

At Longthorpe we believe that PSHCE teaching forms part of the whole curriculum and we aim to incorporate it within many other subjects. We recognise that in our local context, elements of the Department for Education's statutory guidance and recommendations from the Cambridgeshire PSHE Service Primary Personal Development Programme are vital for our children, in order to give them a successful start in their subject learning and in the acquisition of pertinent cultural capital. The aims of the school are to ensure that pupils develop and maintain skills and attributes such as: resilience, self-regulation and adaptability; self-esteem and a healthy concept of self; the ability to develop and maintain healthy relationships; risk management; team-working and critical thinking; self-organisation; the ability to identify links between values and beliefs, decisions and actions; empathy and compassion. We provide high quality PSHCE teaching which will equip pupils with a sound understanding of risk and with the knowledge and skills necessary to make safe and informed decisions throughout their lives. Teaching should equip pupils with knowledge about drug education, financial education, relationship and sex education (RSE) and the importance of physical activity and diet for a healthy lifestyle. Children attending Longthorpe Primary School come from a wide range of backgrounds and bring a variety of cultural, faith, economic and community differences which need to be taken into account as part of their learning and enable them to gain an understanding of the world around them. For

Longthorpe children, this includes the importance of equality, positive religion and belief relationships, different faith perspectives, families and the various forms in which they exist, positive, healthy friendships and respectful relationships of all kinds, personal safety, physical health and mental wellbeing and building an aspirational self-image. At Longthorpe, we believe that this will involve learning about each concept in an age-appropriate manner and developing this knowledge so that during their progression through school, children know more, remember more and can make decisions more skillfully. As pupils progress, their growing knowledge about each of the key concepts set out below should help them to deepen their understanding in each area and build their confidence in forming and managing their views and skills.

Myself & My Relationships	Citizenship	Healthy & Safer Lifestyles	Economic Wellbeing
Beginning & Belonging My Emotions Family & Friends Anti-Bullying Managing Change	Rights, Rules & Responsibilities Diversity & Communities	Managing Safety & Risk Drug Education Personal Safety Body & Growth Relationships & Sex Healthy Lifestyles	Financial Capability

### Implementation

At Longthorpe, we offer a rich, varied, imaginative and progressive PSHCE curriculum to all students, irrespective of their attainment or abilities. This will ensure that they are equipped with skills to be prepared for their individual futures. In order to do this, teachers use and follow the Cambridgeshire PSHE Service Primary Personal Development Programme as well as relevant resources shared by the PSHCE lead during focus weeks, ensuring there is a suitable coverage and focus on the key knowledge and key skills. PSHCE is taught throughout the year as a combination of discrete lessons, as assemblies and by being woven into other curriculum subjects and ongoing daily discussion. Teachers will ensure that children are provided with opportunities to experiment with their views, consider those of others and engage in enriching experiences by taking part in class, year group, phase, whole school and community events and activities such as fundraising projects. During discrete lessons, children spend time recapping what they have already learnt using rolling class evidence books and individual knowledge organisers. Teachers will ensure that within

their teaching, key vocabulary is taught and displayed and children have opportunities to master and apply this within their learning. Teachers ensure that lessons clearly plan for progression to ensure a deepening understanding with which children know more, remember more and can make decisions more skilfully. Recording learning in whole-class floor books provides an opportunity to celebrate children's PSHCE work, to provide a resource which will support them to talk about their learning and a tool for reflecting on their knowledge as it grows.

#### **Anti-Bullying**

Children's learning builds from showing an understanding of their own feelings and those of others, discussing differences between falling out and bullying, to an understanding of the commonalities between different types of bullying. They are taught to recognise the characteristics, different forms, who to talk to and how to offer support to others. Children learn how bullying can affect people's mental wellbeing, reasons for collusion and they learn to identify ways to prevent it and call out bullying behaviour both in school and in the wider world.

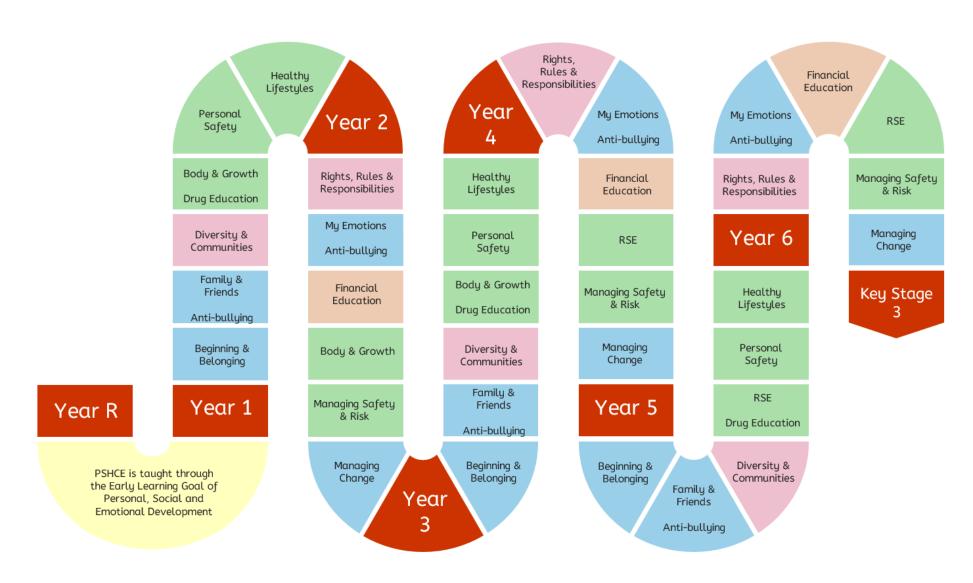

### Relationships & Sex Education (RSE)

Relationships & Sex Education includes learning about emotional, social and physical aspects of life and relationships. It enables pupils to develop essential life skills for building and maintaining positive, enjoyable, respectful and non-exploitative relationships. It explores risks, choices, rights, responsibilities and attitudes. It aims to help pupils to develop skills to keep themselves and others safer, physically and emotionally, both on and offline. Children are taught to develop resilience, thinking critically and developing into empathic, global citizens, who are independent thinkers, have a good sense of self-worth and share understanding around real world issues. The content of our Sex Education programme is gradually developed in an age-appropriate way. Children begin by learning that human babies grow inside their mothers alongside learning in Science that adult animals produce offspring like themselves. They move on to learn that every human began when a seed from a male and an egg from a female join. Children are taught about changes during puberty before learning about sexual reproduction and other ways that eggs and sperm are joined in age appropriate detail. They learn about birth in age-appropriate ways, reflecting the experiences of children and families they know.

## The PSHCE Journey at Longthorpe

EYFS	By the end of the EYFS, children are taught about factors which support their health and wellbeing, the importance of making healthy food choices and how to manage their own basic needs. They learn to identify and express their own feelings, how to build respectful relationships considering the point of view of others and children are taught how to show independence and resilience.
KS1	By the end of KS1, children have been taught how to manage their feelings, how to make friendships and to understand the idea of responsibility. They have begun to learn what bullying and stereotyping are, what different families look like and what it means to be healthy. Children are building on their ability to recognise who they can trust, the nature of stable relationships and they are starting to understand risk. They have been introduced to what medicines are and have been taught names for the main parts of the body. They have been introduced to a basic concept of money and value.
KS2	By the end of KS2, most children understand empathy and have learned how to recognise healthy relationships. They know about the effects of emotions and how to manage their mental health, including how to keep themselves safe both in real and online worlds. The importance of diversity and respect for others has been taught, as well as a knowledge of basic rights, democracy and a deeper understanding of their role in their communities. Children have learned about the impact of prejudice and the pros and cons of social media, building on their understanding of bullying to learn about bystanders and collusion as well as strategies to be assertive. Knowledge about the importance of nutrition, sleep and active lifestyles have been taught as well as some real-life safety and accident prevention skills. Children have learned how drug use affects the body and brain and about laws relating to drug use. They have been taught about personal hygiene, the effects of puberty and most children have built a vocabulary of medical names for body parts. They have begun to build basic financial understanding of saving, spending and budgeting.

### **Units Overview**

## Progression of Knowledge and Skills

		Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Myself & My Relationships	Beginning & Belonging	See themselves as a valuable individual.  Manage the school day successfully.  Show sensitivity to their own and to others' needs.	Understand simple ways to make school a safe, happy place.  Know who to seek help from at home and at school.  Know how to help someone feel welcome in class.		Understand what my role is in helping my school be a place where we can learn happily and safely.  Know how we can build relationships in our class and how this benefits me.  Know what it feels like to be new or to start something new.  Know how I can help children and adults feel welcome in school.  Know what helps me manage a new situation or learn something new.  Know who the different people in my network are who I can ask for help.		The characteristics of healthy friendships on and offline and how do they benefit me.  How trust and loyalty feature in my relationships on and offline.  The benefits and risks of making new friends, including those I only know online.	
	My Emotions	Express their feelings and consider the feelings of others.  Identify and moderate their own feelings.		Know what I am good at and what is special about me. Know how I can stand up for myself.		Why it is important to accept and feel proud of who we are. What the word 'unique' means and		How to make mental wellbeing a normal part of daily life, in the same way as physical wellbeing.

Family & Friends	Show an understanding of their own feelings and those of others.  Set and work towards simple goals, being able to wait for what they want and control their immediate impulses.  Identify and moderate their own feelings socially and emotionally.  Show an understanding of their own feelings and those of others and begin to regulate their behaviour accordingly.	Describe what a good friend is and does and how it	Name some different feelings.  Describe situations in which I might feel happy, sad, cross etc.  Know how my feelings and actions affect others.  Know how to manage some of my emotions and associated behaviours.  Understand the different ways people might relax and what helps me to feel relaxed.  Know who to share feelings with.	What a healthy friendship is and how trust plays an	what to feel proud of about oneself.  Why mental wellbeing is as important as physical wellbeing.  How to communicate one's emotions.  To recognise some simple ways to manage difficult emotions.  What it means when someone says I am "over reacting" and how to show understanding towards myself and others.  How my actions and feelings affect the way I and others feel.  How to care for other people's feelings.  Who to talk to about the way I feel.  How to disagree without being disagreeable.	Balancing the needs of family & friends & how to manage this.	What it means to have a 'strong sense of identity' & 'self-respect'.  What to do to boost one's self-respect  How to manage strong emotions.  How to judge if one's own feelings and behaviours are appropriate & proportionate.  How to recognise how other people feel and respond to them.  What loneliness is and how to manage feelings of isolation.  How common mental ill health is and what self-care techniques to use.  How and from whom to get support when things are difficult.
